

“Communis Smrt”

The Communis Smrt is a one of a kind communication barrier app Translate and Communicate – No More Language Barriers – Easy to Use

Communis Smart App is an app that is both revolutionary and convenient to use. It is an app that will give the user the power to communicate without limits. For Functionality, the app is easy to use due to its three simple features. The first feature is the Synthetic Voice Simulator that will assist the deaf and a foreign person to communicate by translating their native language to whatever languages they wish it to be translated. It also has the ability to create different voices which can be personalized to their liking. As for the deaf, Communis Smart has the capability to translate from Text to Speech or vice versa. The second feature is called the Emergency Module. It is a special Module in a sense that it uses a script for a specific event where the user chooses an event that pertains to the situation of the user. If a user needs a script for a Dental appointment for example, the user can choose from a number of list of possible events. The module contains thousands of pre-programmed responses that will assist the user in every possible encounters.

The third feature of Communis Smart App is video communication. Like Facetime and Skype it allows the user to communicate with another person via video but unlike Skype or Facetime, Communis Smart app has Closed Caption features and Language translations capabilities. The deaf person that wishes to speak to a hearing person can do so by texting and it will pop up on the hearing person end in closed caption. The hearing person can either text it on the phone to respond or he or she can speak on the phone and it will open up on the other side as closed caption. This product would be low cost on the retail shelf and could sell in any big box, and specialty, stores making it a high volume sales product.

The inventor, Derek McKeaver, lives in North Canton Ohio and had an idea for a better way to communicate between languages. Derek contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty.

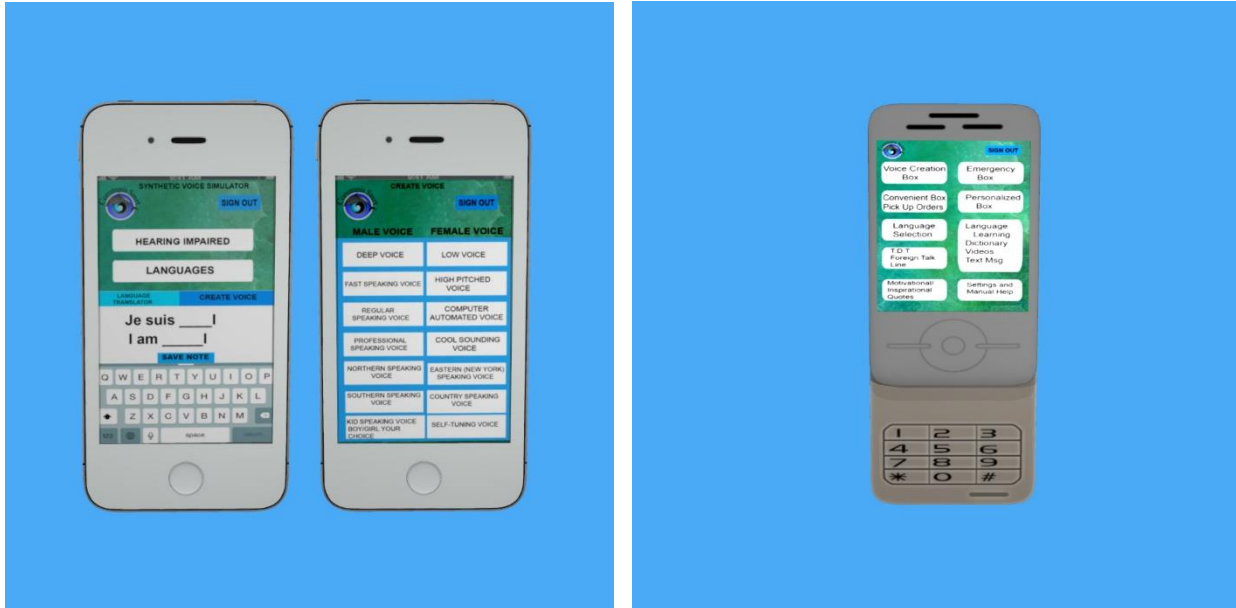

Patent Ability & Engineering

A provisional and design patent application has been filed as of December 2016. The Patent Search was performed by The Mars Rising Network and revealed nothing similar and that a granted patent could be obtained because of the unique design and functionality of the device as compared to other known devices.

The Market

The Domestic Market is very large to say the least. This product would sell on iPhone and Android markets in the USA and throughout the international market.

The retail price would be from \$4.99 to \$49.99. The cost to manufacture would be from \$1,999.00 to \$3,500.00. The costs are an estimate of course ranging from USA or overseas manufacturing and distribution.

If you have an interest in more information regarding the Communis Smrt and are a serious company that would be interested in a licensing agreement or distribution please contact me directly.

Sincerely;

Derek McKeaver / Inventor / Patent Holder
