

“The Buddy Alert”

The Buddy Alert is a one of a kind universal lost item alert system Stop Losing Your Keys, Purses, Wallets – Two Part System – Easy to Use

The Buddy Alert is a great new idea that helps you keep track of all of your valuables all of the time. Losing important items such as keys, wallets, purses, and phones can now be a thing of the past. With this 2-in-1 invention you can keep all of your precious items tracked and never have to worry about them being lost to never be found again. The items that keep you always informed on the whereabouts of your important belongings include; one tracking chip and one locator that displays your desired item's location. This locator can come in the style of either a bracelet, belt buckle, or pendant for a necklace. All three of these options are stylish accessories with LCD screens that will look good on anyone.

The way it all works is the tracking chip has an adhesive pad on the bottom of it, can be attached to almost any surface. Along with its mini speaker and led light which are used in combination to alert when it is in close proximity. The tracking chip is also small, lightweight, and stylish in design so that it isn't intrusive. The flashing light and alarm features can be silenced by simply using the on/off switch on the chip. The accompanying locator also has led lights to flash when the lost item is close by. A small LCD screen is also on the locator item that continuously shows the distance and direction that the tracker chip is in. These two items work together to create a powerful team that will ensure forgetfulness and clumsiness never effect the valuable items that you hold dear. It's also useful in retrieving items in cases of theft. So if you want to stop losing your stuff, along with your mind, use the Buddy Alert! This product would be low cost on the retail shelf and could sell in any big box, and specialty, stores making it a high volume sales product.

The inventor, Stephenson Corneille, lives in Miami Florida and had an idea for a better way to keep track of lost items. Stephenson contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty.

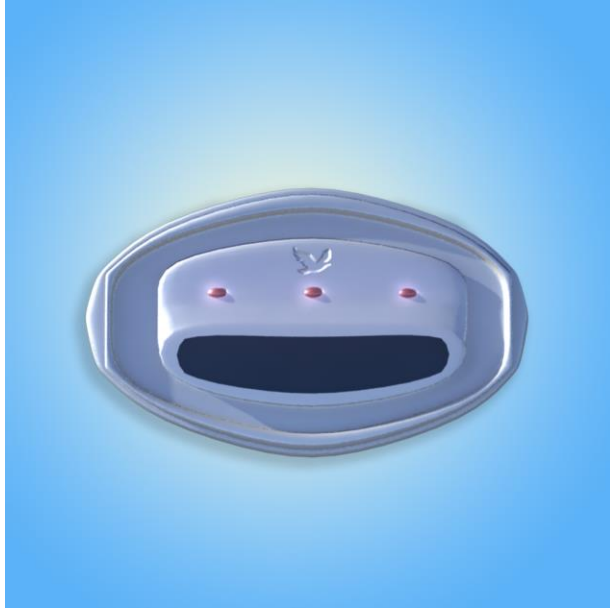

Patent Ability & Engineering

A provisional and design patent application has been filed as of November 2016. The Patent Search was performed by The Mars Rising Network and revealed nothing similar and that a granted patent could be obtained because of the unique design and functionality of the device as compared to other known devices.

The Market

The Domestic Market is very large to say the least. This product would sell in approximately 150,000 retail stores in the USA and throughout the international market.

The retail price would be from \$9.99 to \$79.99. The wholesale amount would be from \$4.00 to \$49.00 and the cost to manufacture would be from \$2.00 to \$35.00. The costs are an estimate of course ranging from USA or overseas manufacturing and distribution.

If you have an interest in more information regarding the Buddy Alert and are a serious company that would be interested in a licensing agreement or distribution please contact me directly.

Sincerely;

Stephenson Corneille / Inventor / Patent Holder
