

“Luggage Tray Table”

The Luggage Tray Table is a one of a kind table for your luggage Use it as a Laptop Tray – Eat Your Lunch on it – Easy to Use - Compact

The Luggage Tray Table is a fantastic simple and unique idea for those who often travel and find they need a little extra space when sitting around with their luggage for food or laptops. The device is super user friendly and doesn't take up much room overall, but it solves a few big problems for people who constantly travel. Ever find yourself without enough room for food, or your laptop? Maybe there are no tables available at all and it's just so uncomfortable to squeeze in a chair and try to hold all your food or have a hot laptop on your legs. With the Luggage Tray Table, you no longer have that problem! This table has already been tested with numerous prototypes and works very well! The system is simple and easy to use. Just rotate the legs out and put it on the top of your luggage, then take the quick snap straps and strap it around the bars for the handle.

There is a little more to it than that which offers some nice features such as: The front leg is telescopic so you can adjust the height of the front to allow for better wrist positioning when using a laptop. The legs also have little push buttons which lock the rotation so you can really get the best angle and lock it into place. On the backside there is some protective foam to allow the tray and luggage bars to be protected from damaging each other. There are also two rubber handle supports which are located on the straps to keep the straps from sliding on the handle bars of the luggage. Additionally, there is a small raised lip around the top of the tray in case of spills, and finally; two slide out tray sides for additional room. Don't leave home without it! This product would be low cost on the retail shelf and could sell in any big box, and specialty, stores making it a high volume sales product.

The inventor, Freddie Sumilhig, lives in Fairfield California and had an idea for a better way to utilize the top of your luggage. Freddie contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty.

Patent Ability & Engineering

A provisional and design patent application has been filed as of November 2016. The Patent Search was performed by The Mars Rising Network and revealed nothing similar and that a granted patent could be obtained because of the unique design and functionality of the device as compared to other known devices.

The Market

The Domestic Market is very large to say the least. This product would sell in approximately 150,000 retail stores in the USA and throughout the international market.

The retail price would be from \$9.99 to \$29.99. The wholesale amount would be from \$4.00 to \$14.00 and the cost to manufacture would be from \$2.00 to \$7.00. The costs are an estimate of course ranging from USA or overseas manufacturing and distribution.

If you have an interest in more information regarding the Luggage Tray Table and are a serious company that would be interested in a licensing agreement or distribution please contact me directly.

Sincerely;

Freddie Sumilhig / Inventor / Patent Holder
