

“Safety Zone App”

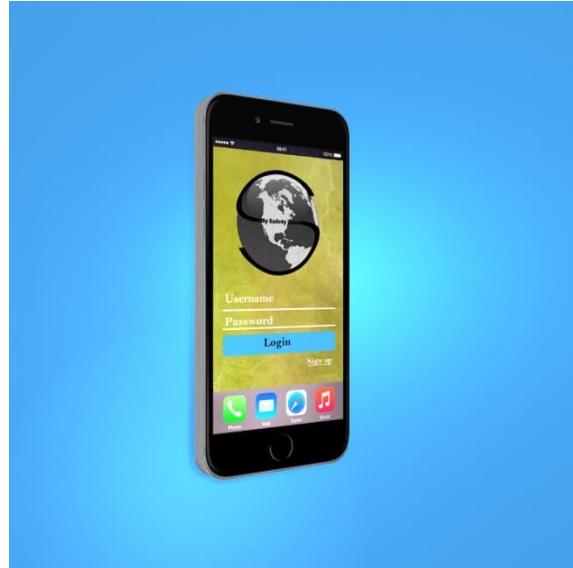

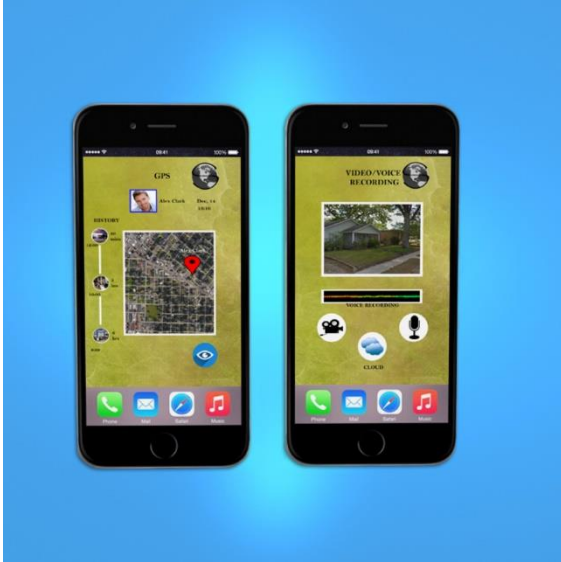

The Safety Zone App is a one of a kind emergency response App Record Audio & Video – Send GPS Info – Security & Safety

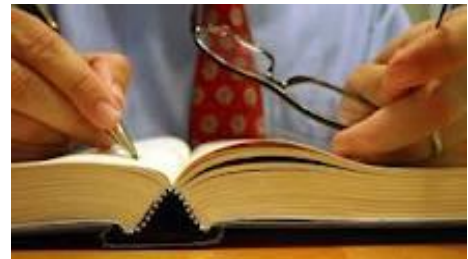

Safety Zone App is a prospected application designed for smart phones to provide safety information, and GPS and video evidence in an emergency. Safety Zone App provides security for the user and their family. The Safety Zone App is a wonderful type of safety app that adds evidence & protection for any victim of a crime. It is the first step a person need for protection against accidents, attacks, and other potential harm that may come.

Safety Zone App is a first response personal security aid and alert application designed to protect you and your loved ones. It stores personal information like driver’s license, personal information, addresses, physical appearance, place of employment, and emergency contacts in an online cloud so that even if the person with the phone is lost the information is always accessible. It has GPS for relocating during an emergency that relays location coordinates to the app.

This intuitive app always initiates video and voice recording that is saved to the cloud system when it’s activated, and forwards this information with GPS coordinates. Without video evidence or GPS locations in an emergency situation, the chances of success in finding missing persons, providing evidence, confirming witnesses, or even proving innocence is very minimal. With this information you would be easily located, helped, and have plenty of evidence to persecute your attackers in the case of tragedy or accident. Useful for parents, travelers, teenagers, or anyone looking for an extra layer of security. Never be without help again with the help of Safety Zone App! This product would be low cost and widely accessible for any type of smart phone.

The inventor Jay Hightower, lives in Van Buren Arkansas, wanted to improve safety. Jay contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty.

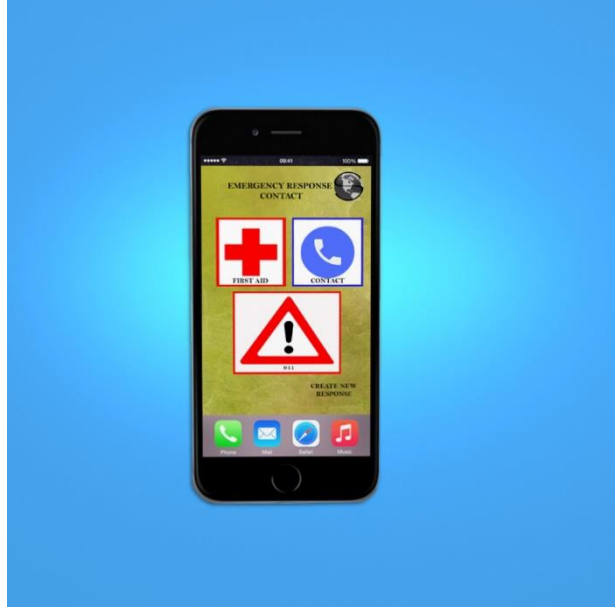

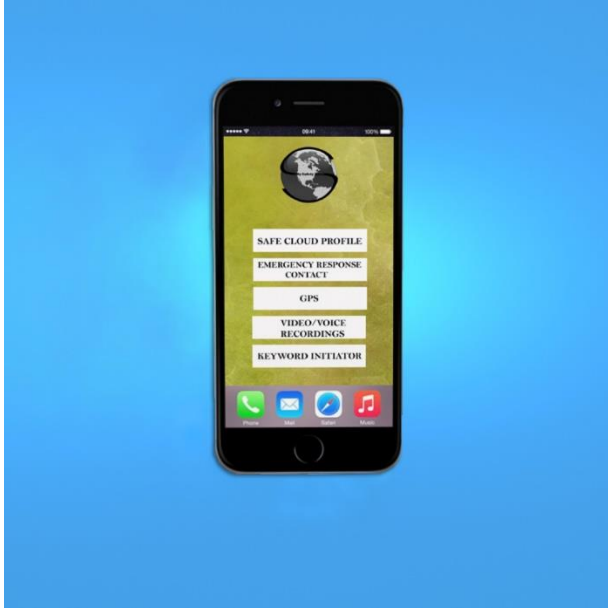

Patent Ability & Engineering

A provisional and design patent application has been filed as of April 2017. The Patent Search was performed by The Mars Rising Network and revealed nothing similar and that a granted patent could be obtained because of the unique design and functionality of the device as compared to other known devices.

The Market

This smart phone app would be available for any smart phone through an app store.

The retail price would be from \$4.99 to \$149.99/month. The cost to manufacture would be from \$999.00 to \$4999.00. The costs are an estimate of course ranging from USA or overseas manufacturing and distribution.

If you have an interest in more information regarding the Safety Zone App and are a serious company that would be interested in a licensing agreement or distribution please contact me directly.

Sincerely;

Jay Hightower / Inventor / Patent Holder
